NUMBER 1 JANUARY–FEBRUARY 1994

Special Issue: Object Oriented Manufacturing Systems
edited by Paul Rogers

Guest editorial
Paul Rogers 1

Critiquing the potential of object orientation in manufacturing
S. Y. Nof 3

Object-oriented product modelling for computer-integrated manufacturing
P. Gu, Y. Zhang and D. H. Norrie 17

Simulation modelling of a manufacturing enterprise with complex material, information and control flows
M. S. Mujtaba 29

Integrating distributed models: the architecture of ENVISION
J. A. Heim 47

Information system design for optical fibre manufacturing using an object-oriented approach
C.-Y. Wang and R. E. Fulton 61

Book review 74

Publications received 75

Announcement 76

NUMBER 2 MARCH–APRIL 1994

Process planning by recognizing and learning machining features
A. K. W. Chan and K. Case 77

An $IDEF_0$ functional planning model for the strategic implementation of CIM systems
J. Sarkis and L. Lin 100

Diagnostic expert systems for PLC controlled manufacturing equipment
W. B. Day and M. J. Rostosky 116

Application of heuristic control technique to path planning of an autonomous guided vehicle
Y.-B. Lee and Y.-N. Na 123

Optimal span of control in CIM systems
G. Bengü 129

Book reviews 136

Announcement 138

NUMBER 3 MAY–JUNE 1994

Issues concerning material removal shape element volumes (MSREVs)
T. R. Kramer 139

A hierarchical approach to concurrent engineering systems
P. J. O'Grady, Y. Kim and R. E. Young 152

A heuristic operation sequence-pattern identification method and its applications in the design of a cellular flexible assembly system
Y.-C. Ho and C. L. Moodie 163

Geometric reasoning for layout design of machining fixtures
Y.-C. Chou 175

Three rapid and effective requirements definition modelling tools: evolving technology for manufacturing system investigations
R. E. Billo, R. Rucker and B. K. Paul 186

Book review 200

NUMBER 4 JULY–AUGUST 1994

A multi-echelon evaluation framework for CIM systems design
M. C. Liu, T. J. Tsai, S. K. Liang and R. K. Li 201

An investigation into the application of group technology in advanced manufacturing systems
A. Gunasekaran, S. K. Goyal, I. Virtanen and P. Yli-Olli 215

Solder advisor—a knowledge-based solder paste selection system
A. Maria, K. Srihari and C. R. Emerson 229

Progress in the journey developing SB-CIMS
J. Xue, C. Wang and R. Mu 242

An algorithm for the weekly production planning of flexible assembly systems
M. Garetti, C. Lanza and A. Pozzetti 249

Publications received 260

Announcement 260

NUMBER 5 SEPTEMBER–OCTOBER 1994

Global shape information modelling and classification of 2D workpieces
M. C. Wu, J. R. Chen and S. R. Jen 261

A heterogeneous, active database architecture for engineering data management
S. D. Urban, J. J. Shah, M. Rogers, D. K. Jeon, P. Ravi and P. Bliznakov 276

Computer-aided inspection of form of a cutter with an indeterminate axis
S. R. Menon and U. Roy 294

Investigation of cutting condition monitoring by visual measurement of surface texture parameters
F. L. Chen, D. Joo and J. T. Black 307

Book reviews 320

Announcement 322

NUMBER 6 NOVEMBER–DECEMBER 1994

Modelling with coloured timed Petri nets and simulation of a dynamic and distributed management system for a manufacturing cell
J. F. N. Tchako, B. Beldjilali, D. Trentesaux and C. Tahon 323

Scheduling and control of flexible manufacturing systems: a critical review
C. Basnet and J. H. Mize 340

An integrated model of process planning and production scheduling
H.-C. Zhang and S. Mallur 356

APM: an automated inspection programming sytem
E. J. Klages and R. M. Wilson 365

Publications received 375

Announcement 375

Index of authors 377
